

HO Original Stewart Decorated F Unit Locomotives with Sound

Original Stewart decorated F units with LokSound Select Dual-Mode decoder and lighted number boards. Most units do not have road numbers. Purchase decals from your favorite decal maker to add road numbers. These units are a new chassis with a new motor. They do not run the same speed as old Stewart production. Remember: Models with DCC/Sound will run slower at the same level of voltage than their counterparts without DCC/Sound. These units will not begin to move until 6 to 8 volts are experienced. Modelers must adjust to these realities when running both types of units. Recommended DCC non sound decoder - ESU #91689 (21 pin)

A Units MSRP \$239.95
B Units MSRP \$229.95
