

# PRR F-30 50' FLAT CAR KIT

1500 F30a flat cars with cast steel frames were assembled at the PRR Pitcairn Shops in 1934. The was 49' 4 3/4 over the platforms. During 1941 the AAR designated the design as a war emergency standard to be used by other railroads. In 1968, there were 1203 F-30's on the PRR roster and in 1980 there were 39 F-30a's on the roster as Conrail Cars. Some of the subclasses were of welded construction and are identical in appearance to the F30a. In the middle of the 50's many were converted to piggyback service and later became TTX cars.

Our kit Includes: One piece plastic molded body, underframe, brake wheel, interior & slope sheet braces, brake wheel, air tank, brake cylinder, triple valve, X2f couplers, Trucks with 33" wheels (RP-25 flanges) and car weights. **MADE IN USA.**
